PACK AND PALLET SECUREMENT

STRAP IT - WRAP IT - HOOD IT
Gordian Strapping supplies stand-alone and integrated end-of-line packaging solutions including strapping, wrapping and hooding equipment.

Established in 1937 and based in Basingstoke, Gordian Strapping is a division of the StraPack Corporation. Founded in Japan in 1933, StraPack is a world leading manufacturer of strapping machines. Innovative design and dedication to high quality have earned StraPack a solid reputation as one of the most respected and reliable global manufacturers of strapping machines.

Gordian’s partners also include OMS. Established in 1949, OMS is a market leader in the design and manufacture of pallet strapping, wrapping and hooding equipment. Gordian Strapping has represented OMS for over 35 years.

Our range of reliable, high quality machinery includes hand tools and Semi & Fully Automatic solutions for Pack and Pallet Strapping, Stretch Wrapping and Stretch Hooding & Shrink Hooding.

As a market leader, installing hundreds of machines across the UK every year, the Gordian Brand is synonymous with quality, reliability and exceptional service.

We are ISO 9001, OHSAS18001, Safe Contractor accredited.
Gordian Strapping supplies a comprehensive range of semi and fully automatic strapping machines for all industry sectors.

Our StraPack machines have earned a global reputation for durability, reliability and ease of use. These hallmarks are an essential part of the success of the StraPack brand, combined with on-going product development and innovation.

We supply strapping machinery for just about every market need. Our range of reliable, high quality machinery includes hand tools and semi and fully automatic solutions for pack and pallet strapping, stretch wrapping, stretch hooding and shrink hoarding.

**BESPOKE MACHINES**

All of our machines can be customised to suit your specific end-of-line packaging requirements.
Gordian Strapping offers end-of-line packaging systems from Italian based OMS Spa. This range includes pallet strapping, stretch wrapping, stretch hooding and shrink hooding equipment.

All machines and systems are designed and built in-house by OMS at their state of the art facility. OMS is renowned for the reliability and durability of its machines, and the dedicated R&D team that continually strives to optimise machine performance and reduce production costs.

**Side Seal Strapper**
Applies straps to a wide variety of conveyed or palletized products.

**Vertical Pallet Strapper**
With integrated sword unit to penetrate the pallet voids.

**Horizontal Pallet Strapper**
Applies any number of horizontal straps according to pack requirements.
Gordian Strapping offers a complete range of pallet wrapping machines and systems.

These machines wrap pallets quickly and efficiently. They can be used with all standard films from 12 to 35 microns and also with pre-stretched films.

From turntable and rotary arm machines to the very latest in ring wrapping technology, our range of pallet wrappers offers high performance, ease of use and reduced maintenance.
Gordian Strapping offers a range of horizontal stretch wrapping machines, also known as orbital, spiral or tunnel wrappers. The machines are available in manual, semi-auto and fully-auto configurations.

They are ideally suited for long shaped products such as aluminium or plastic profiles, plastic pipes, ladders, MDF mouldings and architraves. Special versions are available for wrapping tyres, palletised products and cardboard boxes.

**TE 600 B**
Entry-level manual stretch wrapper.

**TE 1200 K**
Cardboard box stretch wrapper.

**TE 1000 R/I/II**
Semi-auto wheel and tyre stretch wrapper.

**TE 1000**
Semi-auto stretch wrapper suitable for most market sectors.
Gordian Strapping supplies a range of fully automatic stretch hooding machines which apply a stretchable, gusseted plastic hood to palletized and non-palletized products without using heat. Hoods can be printed to enhance product branding.

Stretch hooding provides stability during transport and protection from dust. It is a common method of packaging palletized products ranging from building materials, food and beverage, corrugated and horticulture.
Shrink hoooding involves applying a heat shrinkable hood to a pack and then shrinking it to the pack using hot air emitted from gas burners.

Gordian supplies a wide range of machinery that is designed and built to the highest standards. Hoods can be printed to enhance product branding.

**Pallet Shrink Hooding Machines**

**AT53**
- **Pallet Shrink Hooder**
- Fully-automatic, forms and applies hoods using tubular shrink film.

**FT20**
- **Turntable Pallet Shrink Hooder**
- Stand-alone semi-automatic shrink hooder for low volume applications.

**FT55**
- **Pallet Shrink Hooder**
- Semi-automatic, can be stand-alone or integrated into a packaging line.
As a UK market leader, Gordian Strapping has a strong reputation for providing state-of-the-art strapping, wrapping, and hooding systems that can be integrated effortlessly with existing lines and equipment.

Our experienced sales and engineering teams will carry out a full line survey and propose a solution that is designed to optimize your efficiency and output.

Working with specialist packaging line system integrators, OEMs or our customers’ own project engineers, we have built a reputation for delivering complex systems on time across a wide range of industries and market sectors for over 80 years.

**TURNKEY SOLUTIONS**

Vertical Pallet Press

Can be stand-alone or fully integrated into an existing or new conveyor line.
STRAPPING MATERIALS & ACCESSORIES

We supply a full range of polypropylene, polyester, corded and steel strapping from stock.

Gordian also supplies a range of paper and film banding products as well as stretch wrap for our vertical and horizontal wrapping machines. Shrink and stretch hoods are also available to order.

For hand-strapping of packages, we offer a range of manual tools for use with steel strapping and battery-powered tools to heat-seal plastic strapping.
SERVICE & SUPPORT

We take pride in our after sales service. Our complete support network, via a nationwide team of skilled service engineers, provides maintenance and repair services to our customers throughout the United Kingdom and Ireland.

We aim to resolve all call outs at the first visit to minimize down-time on your machine.

All of our engineers are fully trained to support the equipment we offer from installation, commissioning and ongoing maintenance for the complete range of machines supplied by Gordian Strapping.
